The Director Planning and Building explained that the street face of the building, although called five storeys, would only be four storeys and that the five storey description is due to the double height of the bottom floor retail space and the mezzanine level to be located on the alley side of the building. Staff confirmed that the building height would not be greater than the maximum allowable height for a four storey building.

Mr. Sherwood also requested clarification as to the location of the parking access to the new building as he is concerned about vehicle conflicts between the new parking entrance and existing laneway parking entrances/exits.
