ENVIRONMENT AND SOCIAL PLANNING COMMITTEE

MINUTES

An Open meeting of the Environment and Social Planning Committee was held in the Clerk's Committee Room, City Hall, 4949 Canada Way, Burnaby, B.C. on **Tuesday, 2019 September 03** at 6:00 p.m.

1. CALL TO ORDER

- PRESENT:**
- Councillor Colleen Jordan, Chair
 - Councillor Joe Keithley, Vice Chair
 - Councillor James Wang, Member
 - Mr. Joel Gibbs, Citizen Representative
 - Mr. Elie Lubendo, Citizen Representative
 - Ms. Mary Lumby, Citizen Representative
 - Ms. Doris Mah, Citizen Representative
 - Mr. Andrei Zawadzki, Citizen Representative
 - Ms. Tessa Vanderkop, Burnaby Board of Trade
 - Trustee Peter Cech, Burnaby School Board
- ADVISORY ORGANIZATIONS:**
- Ms. Dana Wong, FortisBC
 - Ms. Deborah Harford, Simon Fraser University
 - Mr. Jerry Muir, BC Hydro
- ABSENT:**
- Mr. Frank Huang, Citizen Representative
- STAFF:**
- Mr. Dipak Dattani, Director Corporate Services
 - Ms. Lee-Ann Garnett, Assistant Director Long Range Planning
 - Ms. Simone Rousseau, Manager Environmental Services
 - Ms. Heather Edwards, Manager Parks Planning Design & Dev.
 - Ms. Margaret Manifold, Senior Social Planner
 - Ms. Lise Townsend, Ecosystem Planner
 - Ms. Monica Macdonald, Administrative Officer

The Chair called the Open meeting to order at 6:05 p.m.

The Chair recognized the ancestral and unceded homelands of the Skwxwú7mesh and traditional hə́nqəmiñəm speaking people, and extended appreciation for the opportunity to hold a meeting on this shared territory.

The Chair welcomed members and facilitated a round of introductions.

2. MINUTES

a) Minutes of the Environment and Social Planning Committee Open meeting held on 2019 June 04

MOVED BY MR. LUBENDO
SECONDED BY MS. MAH

THAT the minutes of the Environment and Social Planning Committee Open meeting held on 2019 June 04 be adopted.

CARRIED UNANIMOUSLY

MOVED BY MS. LUMBY
SECONDED BY MS. VANDERKOP

THAT item 4a) Report be brought forward at this time.

CARRIED UNANIMOUSLY

4. REPORT

a) Report from the Director Corporate Services and the Director Planning and Building Re: Climate Change

The Director Corporate Services and the Director Planning and Building submitted a report in response to a resolution adopted at the 2019 May 06 Committee meeting regarding taking action on climate change.

Staff advised that, for a number of reasons which are outlined in the report, they would not be able to support the community carbon pollution targets proposed in the resolution. Similar targets set by Metro Vancouver, however, would be feasible to implement and yet still challenging,

Staff referred to Table 1 in the report, *Targets Summary & Recommended Targets for Burnaby*, highlighting Burnaby's recommended targets which include a 45% reduction by 2030, 75% reduction by 2040, and carbon neutral by 2050. Staff advised that these targets align with global and regional targets to better enable regional partnerships and action.

The Committee further stated that the City has limited jurisdiction and control over the implementation of actions to reduce community emissions, and emphasized that in achieving these targets, would need to work together with Metro Vancouver and in partnership with the Provincial and Federal governments.

The Committee referred to the City of Vancouver's 2030 target of 50% and asked what Vancouver is doing differently to achieve that higher target.

Staff advised Vancouver's 50% target used 2007 emission reduction levels as a base level, which are less than 2010 levels and roughly a 45% target equivalency. In setting community emissions targets, 2010 levels are now being used as the base level in the region.

The Committee further inquired whether the targets set by other regional municipalities and the Province was the main driving force behind choosing the recommended targets for Burnaby.

Staff advised they also considered the science behind climate change, the Intergovernmental Panel on Climate Change recommended targets; as well as, regional relationship building. Staff stressed that working with neighbouring communities provides greater leverage for achieving targets.

The Director Corporate Services and Director Planning and Building recommended:

1. THAT the Committee recommend to Council to:

- a) Declare Climate Emergency to demonstrate understanding of and commitment towards the climate crisis and the necessity of an energy transition;
- b) Update the City's community carbon pollution reduction targets, including interim targets that demonstrate the commitment to accelerate climate action, as outlined in Section 6.3 of this report; and,
- c) Direct staff to bring forward a separate report on Climate Action Framework which would outline 'Big Moves and Fast Track Actions' to ensure that climate action continues to progress within the City across all sectors at a pace commensurate with the City's updated community carbon pollution reduction targets.

MOVED BY MS. LUMBY
SECONDED BY MS. MAH

THAT the recommendation of the Director Corporate Services and the Director Planning and Building be adopted.

The Committee proposed that Burnaby's carbon pollution reduction targets be more aggressive and amend the recommended targets as follows: 60% reduction by 2030 and carbon neutral by 2040.

The Committee noted that it may be appropriate to wait for subsequent detailed reports, which would provide additional information such as financial obligations on this and other matters, before increasing the report's recommended targets.

Further, the Committee pointed out that if the City set higher targets than other communities in the region and showed leadership, there could well be a positive ripple effect as other municipalities watch to see how Burnaby is going to achieve its targets.

Staff advised that the approach to determining these targets does demonstrate leadership and noted, while a number of municipalities have declared Climate Emergency, many have not yet committed to specific targets. As well, some municipalities who have adopted targets, have not put forward any plan to meet those targets. Burnaby, on the other hand, has identified realistic targets and committed to achieve them.

At the conclusion of the discussion, a motion to amend the report was introduced:

MOVED BY MR. GIBBS
SECONDED BY MR. ZAWADZKI

THAT the Climate Change report be **AMENDED** to change Burnaby's recommended carbon pollution reduction targets as follows: 60% reduction by 2030 and carbon neutral by 2040.

DEFEATED

(Opposed: Councillor Jordan, Councillor Keithley, Councillor Wang, Mr. Lubendo, Ms. Lumby, Ms. Mah, Ms. Vanderkop, and Trustee Cech)

The Main motion was then brought forward:

MOVED BY MS. LUMBY
SECONDED BY MS. MAH

THAT the recommendation of the Director Corporate Services and the Director Planning and Building be adopted.

- CARRIED

(Opposed: Mr. Gibbs and Mr. Zawadzki)

The normal order of the agenda resumed.

MOVED BY MR. ZAWADZKI
SECONDED BY TRUSTEE CECH

THAT the Correspondence be received.

CARRIED UNANIMOUSLY

3. **CORRESPONDENCE**

a) **Correspondence from the Minister of Environment and
Climate Change Strategy**
Re: South Okanagan-Similkameen National Park Reserve

Correspondence was received from the Minister of Environment and Climate Change Strategy regarding the creation of a national park reserve in the South Okanagan-Similkameen. Minister Heyman expressed appreciation to the City for its support for the park, advising that he has signed a Memorandum of Understanding (MOU) between Canada, British Columbia and the syilx/Okanagan Nation. The MOU, he added, confirms the working boundary for the proposed national park reserve, outlines next steps, and provides a framework of collaboration as negotiations begin for an establishment agreement.

b) **Correspondence from Environment and Climate Change
Canada**
Re: Modifications to Schedule 1 of the Species at Risk Act

Correspondence was received from Environment and Climate Change Canada providing information on modifications to Schedule 1 of the Species at Risk Act. The Ministry advised that 40 species at risk have recently been registered under the *Species at Risk Act*, with 15 of these species found in British Columbia.

c) **Correspondence from Metro Vancouver**
**Re: Sensitive Ecosystem Inventory - Sub-Regional Profiles
and Assessment of Ecosystem Loss**

Correspondence was received from Metro Vancouver providing a copy of the above noted report adopted at the Metro Vancouver Regional District meeting held on 2019 May 24. The report provides an analysis of the inventory and in-depth assessment of ecosystem loss.

**d) Correspondence from Metro Vancouver
 Re: Best Management Practices for Invasive Species:
 English Holly, English and Irish Ivies, Yellow Archangel,
 Himalayan Balsam, and Parrot's Feather**

Correspondence was received from Metro Vancouver providing a copy of the above noted report adopted at the Metro Vancouver Regional District meeting held on 2019 June 28. The report provides information on five new invasive species best management practices documents and promotion efforts.

**e) Correspondence from the United Way of the Lower Mainland
 Re: Support for the United Way Period Promise Campaign**

Correspondence was received from the United Way of the Lower Mainland providing information and requesting support for their United Way Period Promise campaign.

The Committee inquired whether this was a matter for the Parks, Recreation and Culture Commission..

Staff advised that this item was on the 2019 July 25 Council Correspondence package and may be referred to the Commission or another Committee at the 2019 September 09 Council meeting under new business.

**f) Correspondence from the Green Communities Committee
 Re: Climate Action to Reduce Green House Gas Emissions -
 Level 3 Recognition**

Correspondence was received from the joint Provincial-Union of British Columbia Municipalities Green Communities Committee (GCC) congratulating the City for its successful efforts to undertake significant climate action to reduce greenhouse gas emissions in the 2018 reporting year, and awarded the City Level 3 recognition – *Accelerating Progress on Charter Commitments*. The GCC, established under the Community Charter to support local governments in achieving their climate action goals, administers a multi-level Climate Action Recognition Program. Information on the Program was attached to the letter.

**g) Correspondence from the Burnaby Board of Trade
 Re: Climate Change - Support for Reducing Greenhouse Gas
 Emissions**

Correspondence was received from the Burnaby Board of Trade (BBOT) pledging its on-going support towards reducing greenhouse gas emissions and encouraging the City to urgently proceed with review and implementation of its emissions reduction plans.

The Committee expressed appreciation to the BBOT for its support and commitment to reducing community emissions.

h) Correspondence from 13 Burnaby residents
Re: IPCC Targets and Greenhouse Gas Reduction

Correspondence was received from 13 Burnaby residents regarding climate emergency and IPCC targets, and advocating for higher community-wide greenhouse gas reduction targets for Burnaby.

i) Correspondence from Bruce Gibbons
Re: Request for Support to Prohibit Bottling of Groundwater

Correspondence was received from Mr. Bruce Gibbons, from Vancouver Island, regarding a request to prohibit bottling and selling of groundwater in Burnaby. Mr. Gibbons also seeks support for a resolution submitted to the upcoming Union of British Columbia (BC) Municipalities convention asking the provincial government to stop approving licences for the bottling and commercial sale or export of groundwater from the aquifers of BC.

j) Correspondence from Phil Dupasquier
Re: Request to Ban Plastic Election Signs

Correspondence was received from Mr. Phil Dupasquier seeking support to ban plastic election signs. The writer advised that the signs have a shelf-life of six months, or three elections, and is usually disposed of after just one election period.

The Committee advised that it is too late to take the requested action for the 2019 Federal election.

Staff advised that the sign bylaw will be reviewed in the near future which would address some of the concerns raised by Mr. Dupasquier.

k) Correspondence from Joanne Reid
Re: Request for Accessible Washrooms

Correspondence was received from Ms. Joanne Reid regarding a request for accessible washrooms, including the installation of change tables for adults.

The Committee advised that this was a matter for the Parks, Recreation and Culture Commission.

Staff advised that this item was on the 2019 July 25 Council Correspondence package and may be referred to the Commission at the 2019 September 09 Council meeting under new business.

**l) Memorandum from the Administrative Officer
Re: Waterways of Burnaby Map**

A memorandum was received from the Administrative Officer advising that Council, at the Open Council meeting held on 2019 June 24, adopted the above noted report and approved the production of an updated Waterways of Burnaby map.

**m) Memorandum from the Deputy City Clerk
Re: Amendments to Solid Waste and Recycling Bylaw and
Bylaw Notice Enforcement Bylaw**

A memorandum was received from the Deputy City Clerk advising that Council, at the Open Council meeting held on 2019 July 29, adopted the above noted report providing details on the revised bylaw amendments. The amendments reflect changes with service delivery, strengthen enforcement provisions and improve readability.

4. REPORT

**a) Report from the Director Corporate Services and the
Director Planning and Building
Re: Climate Change**

This item was dealt with earlier in the agenda.

5. NEW BUSINESS

Trustee Cech - Burnaby School District's Sustainability Update

Trustee Cech provided the following update on the District's current projects and initiatives:

- Lighting projects - completed full interior retrofit with new LED fixtures, occupancy sensors, and dimming wireless controls at South Slope Elementary and Byrne Creek Secondary schools. Also, completed parking lot conversion to LED and installed walkway lighting at Burnaby Central Secondary school;
- HVAC and boiler projects – completed retrofit to high efficiency condensing boilers, HVAC and controls upgrades at Brentwood Park Elementary, Morley Elementary, and Inman Elementary schools. Also, completed the upgrade of HVAC system at Riverway West; and,
- Energy Foreman – staffing of the new position has been completed.

Councillor Keithley - Making Burnaby's Fleet Cars and Trucks Environmentally Friendly

With unanimous consent, Councillor Keithley brought the following resolution before the Committee for consideration:

WHEREAS the City of Burnaby has a large fleet of vehicles and trucks that largely run on fossil fuels; and

WHEREAS a number of vehicles and trucks are now available which use alternative fuel sources - including electric vehicles; and

WHEREAS a large number of cities in BC have acknowledged that we are in Climate Emergency, and Burnaby is in the process of taking steps to reduce our GHGs;

THEREFORE BE IT RESOLVED THAT staff report back to the Environment and Social Planning Committee and Council on how the fleet is managed, and outline a strategy to purchase vehicles and trucks which use alternate fuel and electric vehicles and trucks.

Arising from discussion, the following motion was introduced:

MOVED BY COUNCILLOR KEITHLEY
SECONDED BY MS. LUMBY

THAT this matter be **REFERRED** to staff to be included in the *Climate Action Framework* report currently being prepared for the Committee.

CARRIED UNANIMOUSLY

Councillor Keithley - Retrofitting City of Burnaby Buildings with Solar Panels

With unanimous consent, Councillor Keithley brought the following resolution before the Committee for consideration:

MOVED BY COUNCILLOR KEITHLEY
SECONDED BY MR. GIBBS

WHEREAS the City of Burnaby owns a large number of buildings; and

WHEREAS it is generally acknowledged that an efficient way of reducing GHGs produced by buildings is to have at least part of their needed energy supplied by solar panels; and

WHEREAS a large number of cities in BC have acknowledged that we are in Climate Emergency, and Burnaby is in the process of taking steps to reduce our GHGs;

THEREFORE BE IT RESOLVED THAT staff report back to the Environment and Social Planning Committee and Council on the feasibility of advancing the City Hall building as the first city building to be converted to solar power, and outline a strategy to have all other civic buildings use solar power.

- Amended

The Committee inquired about including this matter in the *Climate Action Framework* report as well.

Staff advised that, as the City has an extensive number of civic buildings to be considered in relation to the climate action framework, it would be preferable to prepare a separate report.

Arising from discussion, the following motion was introduced:

MOVED BY COUNCILLOR JORDAN
SECONDED BY MR. GIBBS

THAT the recommendations contained in the resolution be **AMENDED** to read as follows: "THAT the Environment and Social Planning Committee request Council to ask staff to prepare a report back to the Environment and Social Planning Committee and Council on the feasibility of advancing the City Hall building as the first city building to be converted to solar power, and outline a strategy to have all other civic buildings use solar power."

CARRIED UNANIMOUSLY

MOVED BY COUNCILLOR KEITHLEY
SECONDED BY MR. GIBBS

THAT the recommendations be adopted, as **AMENDED**.

CARRIED UNANIMOUSLY

Councillor Jordan – World Rivers Day

Councillor Jordan advised that World Rivers Day will be held on Sunday, 2019 September 22, 11:00 a.m. to 4:30 p.m. at the Burnaby Village Museum.

Councillor Jordan - ESPC Meeting on Thursday, 2019 October 10

Councillor Jordan advised an extra Committee meeting will be held on Thursday, 2019 October 10 at 6:00 p.m. in the Clerk's Committee room.

6. INQUIRIES**Councillor Jordan – Social Sustainability Strategy Update**

As a follow up to an inquiry made at the 2019 June 04 meeting, Councillor Jordan requested staff provide a report on the status of the Social Sustainability Strategy (SSS) Update.

Staff advised that the SSS was adopted in 2011 and an Implementation Plan, including a plan to update, was developed shortly afterward.

Staff provided an overview of the Update, advising that the SSS is an on-going document and “active” strategy; and guides staff's work plan, initiatives and day-to-day activities. Further, the Update needs to be considered in the context of the City's current policies and priorities, such as the Transportation Plan Update, Housing Task Force initiatives, and update of the Official Community Plan.

Staff advised that the Strategy has seven priorities and provided some examples of City initiatives that support those priorities, as follows:

1. Meeting Basic Needs – such as economic security. Example #1 childcare and before-and-after-school care – working with the Burnaby School District to create new childcare spaces on District land, early in 2020 spaces will be available (for children ages 3-5 years old) at Capitol Hill and Montecito Elementary schools. Currently working with the District on a feasibility study to create more before-and-after-school care spaces.

Example #2 affordable housing, the City is soon opening its first supportive housing facility at Norland and Ledger with 52 units for people who are homeless. As well, the City opened its first homeless shelter in 2019 August.

2. Celebrating Diversity and Culture – being inclusive of Burnaby's different cultures. Example #1 including indigenous, West African and Eastern European groups in summertime events at Burnaby Civic Square.

Example #2 – the City is a member of UNESCO's Canadian Coalition of Municipalities Against Racism and this fall will be a pilot site for community and educator based training on combating radicalism, especially in youth.

3. Getting Involved – civic and community engagement, website enhancements and expansion of public consultation processes, for example the work done through the Mayor’s Task Force on Community Housing.
4. Learning for Life – Example - partnered with Simon Fraser University to host the Festival of Learning that all people can engage in at no cost.
5. Enhancing Neighbourhoods – Example - use of the Density Bonus Program to plan new community facilities in North West Burnaby, and C.G. Brown and Cameron Centre replacements.
6. Getting Around – accessible and safe transportation. Example – implementation of Town Centre standards such as wider sidewalks, bike lanes, and new benches.
7. Protecting our Community – emergency preparedness and crime prevention. Example – creation of the City’s first Community Safety Plan and recent Community Safety Survey.

The Committee inquired regarding the location of the homeless shelter and how it was different from the warming shelters.

Staff advised that the shelter is at Douglas Road and Springer and is open 24/7 from 10:00 a.m. to 10:00 p.m. It is different from the warming shelters which provides immediate response and is only open December to March.

The Committee noted that a climate risk assessment (undertaken as part of the Climate Emergency process) would have some important implications for the Strategy; outlining increased climate change impacts such as more wildfire smoke and more extreme heat, which would lead to more health issues especially for vulnerable populations needing shelter.

The Committee inquired regarding difficulties in completing an annual review of the strategy.

Staff advised that it is difficult to do a rigorous annual review, as staff are a small team working with the Strategy partners. A review was done after the completion of the first phase, with another review planned once the second phase is completed. In the meantime, regular updates to the Committee will be given.

Councillor Jordan – Childcare Needs Assessment and Strategy

The Chair requested an update on the status of the childcare needs assessment and strategy.

Staff advised that the Provincial government announced they would promote the creation of a universal childcare system by creating new spaces, provide funding for parents, and initiatives to increase the workforce in the childcare facilities.

Further to this announcement, the Province made funding available to municipalities for childcare needs assessments and strategies.

Staff advised they had applied for this grant, received funding, and have recently hired a consultant to help with the childcare study and strategy for the City.

In conclusion, staff reported that an online survey for childcare providers' and parents' input is being done this fall.

Joel Gibbs – Accessibility

Mr. Gibbs advised that the area of Joe Sakic Way and Kensington (South side) is inaccessible and inquired regarding City's accessibility policy and procedure.

Staff to follow up and provide information.

7. **ADJOURNMENT**

MOVED BY MR. LUBENDO
SECONDED BY MS. LUMBY

THAT this Open Committee meeting do now adjourn.

CARRIED UNANIMOUSLY

The Open meeting adjourned at 7:55 p.m.

Monica Macdonald
ADMINISTRATIVE OFFICER

Councillor Colleen Jordan
CHAIR

Dan Withers
MetroVan Repair Cafes

Burnaby, BC

September 13, 2019

Office of the Clerk
4949 Canada Way
Burnaby, BC V5G 1M2

Dear Environment and Social Planning Committee,

Please accept this letter as a formal request to present at the next committee meeting.

We wish to propose a partnership between the City of Burnaby and MetroVan Repair Cafes to fund a sustainability and community-building program called a "Repair Cafe". A Repair Cafe program is a series of community events where visitors can learn how to fix their household items with the help of experienced volunteers. The aim is to reduce waste, create connected and inclusive communities, and build strong local economies.

MetroVan Repair Cafes is founded by Yining Sun (Sunny) and Dan Withers. Sunny has acted as manager for the very successful Maple Ridge Repair Cafe for the past two years and has also volunteered at many other local repair events. Dan is a trained and experienced engineer that has volunteered at many similar repair events throughout the area. MetroVan Repair Cafes is born out of the realization that there are many resource limitations to the few existing independent local programs and there is an unmet demand and unmet potential in our communities. We see that an organization operating over a larger area and that can consolidate resources such as funding, volunteer pools, and management would be better equipped to supply and support quality value-added repair programs to local communities in the Metro Vancouver area.

Thank you for your consideration,

Dan Withers

Co-Founder

Ministre de l'Environnement et
du Changement climatique

Minister of Environment
and Climate Change

Ottawa, Canada K1A 0H3

AUG 29 2019

His Worship Mike Hurley
Mayor of the City of Burnaby
4949 Canada Way
Burnaby BC V5G 1M2

Dear Mayor Hurley:

Thank you for your correspondence of June 25, 2019, regarding the city council's support for the proposed national park reserve in the South Okanagan-Similkameen region of British Columbia and for enclosing a report by the City of Burnaby's Environment and Social Planning Committee.

On July 2, 2019, the governments of Canada and British Columbia and the syilx/Okanagan Nation signed a Memorandum of Understanding (MOU) to formally work toward establishing a national park reserve in the South Okanagan-Similkameen. The MOU confirms the working boundary for the proposed national park reserve. Additional information and a copy of the MOU are available at <https://letstalksouthokanagansimilkameen.ca/Okanagan>.

The next step in the process will be negotiating a formal national park reserve establishment agreement that will define the terms and conditions for the establishment, development, management and operation of a national park reserve. The establishment of a national park reserve in the South Okanagan-Similkameen represents a valuable opportunity to advance reconciliation and for nation-to-nation engagement with the syilx/Okanagan Nation. It also provides an opportunity to protect one of Canada's iconic natural and cultural landscapes and share this unique and inspiring place with Canadians and visitors from around the world.

For any additional information on this matter, please contact Parks Canada's Director of Protected Area Establishment, Kevin McNamee, at kevin.mcnamee@canada.ca.

I appreciate your commitment to this important conservation initiative.

Sincerely,

The Honourable Catherine McKenna, M.P.

*** UPDATED ***

From: Angelika Hackett <[REDACTED]>
Date: September 3, 2019 at 5:45:09 PM PDT
To: mayor@burnaby.ca
Subject: Let's adopt higher climate targets

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To the Mayor and Council of Burnaby,

I am writing to express my support for the adoption of ambitious new climate targets in Burnaby.

We are entering a critical decade of make-or-break years when it comes to putting the brakes on climate change, and the 2018 IPCC report states that we must limit our average global temperature warming to 1.5 degrees in order to avoid the worst impacts of the crisis.

Cities are responsible for 50-70% of emissions in Canada. Burnaby's current community emissions target currently sits at a low 5% by 2041, while climate science demands we reach a 45% reduction by 2030 and 100% reduction by 2050, as a minimum. We acknowledge and commend the environment and social planning committee for exploring raising our community-wide emissions targets to reach 100% reduction by 2030, which would be the most ambitious policy for reductions in Canada.

As a Burnaby resident I am calling on Burnaby City Council to model the visionary leadership we need to attain deep and swift emissions reductions over the coming decade, by:

1. Passing a formal resolution to adopt at minimum, the latest IPCC recommended GHG reduction targets of 45% below 2010 levels by 2030, 65% by 2040 and 100% by 2050 for all community-wide emissions.
2. Establishing a meaningful set of interim targets and ensuring that these targets are incorporated into all forthcoming municipal planning documents, including Community Energy and Emissions Plans (CEEPs) and Official Community Plans (OCPs.)
3. Directing city staff to draft a plan for annual transparent measuring and reporting on the municipality's community emissions beginning no later than 2020, including a proposal for how these activities will be funded.

The District of North Vancouver, City of North Vancouver, District of West Vancouver Vancouver, Richmond, New Westminister, and Port Moody have all taken steps to adopt the IPCC-recommended targets. I don't want Burnaby to fall behind when we know that this City is proud of its longstanding leadership on climate issues.

I look forward to Burnaby revitalizing its commitment to breakthrough climate action as we transition our region to the first zero-carbon metropolis in Canada!

Sincerely,
Angelika Hackett

 New Westminster, BC V3L 0E7

Proposed Gondola for Simon Fraser University

The proposed gondola to SFU, regardless of the route chosen, presents a threat to the Burnaby Mountain Conservation Area (BMCA) and to Stoney Creek. The BMCA is a special park within the City of Burnaby that surrounds the Simon Fraser University campus. The covenant between the Province of BC and the City of Burnaby makes it different from other city parks by limiting the activities allowed. It has also been identified by the City as an Environmentally Sensitive Area.

A number of things already impact this wildlife refuge:

- the cumulative effects of developments on the mountain top
- road salt contamination
- encroachments of transmission lines, pipelines, access roads, and mountain bike trails
- disruptions resulting from the Trans Mountain Pipeline Expansion Project

For over 25 years, Stoney Creek Environment Committee volunteers have been passionate stewards of their salmon-bearing stream. We oppose the current proposal for several reasons:

1. The Feasibility Study makes it clear that by promoting the tourism aspect of the gondola [*BMGT_Feasibility_Study_04-27-2018.pdf Section 8.3.2*] the proponents misunderstand the rationale for establishing a Conservation Area in the first place. The covenant between the province and the City recognizes the special need for conservation in this area. The gondola must not be justified as a tourist attraction that would increase human activities in the BMCA.
2. While the overall goal of reducing greenhouse gas (GHG) emissions by replacing diesel buses seems reasonable, we note some flaws in the business case presented: The current proposal has not looked at fully electric buses as an alternative. That technology is advancing rapidly from several Canadian manufacturers and BC Transit is committed to switching out its entire fleet of buses to fully electric within 10 years. The GHG reduction estimate fails to account for the large emissions from the concrete that would be used for tower pads and terminals.
3. The argument that a gondola would solve the problem of interrupted or delayed bus service to SFU/UniverCity during winter weather [for about 10 days each year according to *Burnaby Mountain Gondola Transit Project Backgrounder Summer 2011*], is questionable as:
 - a. The majority of those days do not entail a closure and full shut down of bus service.
 - b. Translink have already indicated they will switch out articulated buses and use tire socks during bad weather on Burnaby Mountain, which will help reduce service disruptions.
 - c. A gondola would likely be shut down periodically for maintenance as is the Peak-to-Peak gondola at Whistler.

 City Manager
 Dir. Corporate Services
 Dir. Engineering
 Dir. Planning and Building

Referred to:
 Environment and Social Planning Committee
 (2019.10.10)

4. Stoney Creek begins at the top of the mountain and supports 4 species of salmon, cutthroat trout, and the red-listed Nooksack Dace. In addition, many animals live in the BMCA forest including the red-legged frog, which is a blue-listed species-at-risk.
5. Our bird surveys over the years demonstrate that an increase in human activity in an area results in a reduction in bird populations. Noise from both the construction activities with helicopters and the ongoing presence of a gondola will drive birds further away.
6. The BMCA has already seen a huge increase in the number of trails and the number of people using the area and any further activity will put it in more jeopardy.
7. Local residents in the Forest Grove communities were very much opposed to any gondola project the last time there was public discussion on this subject.

Please give us assurance that TransLink will request that the project be designated as 'reviewable' under the *BC Environmental Assessment Act (BC EAA) Reviewable Projects Regulation* for a Provincial Environmental Assessment of the south part of the BMCA and of the cumulative effects of all stressors on Stoney Creek.

We await your reply,

Alan James, BSc, MA
Member at Large - Education, Stoney Creek Environment Committee
PO Box 56522 Lougheed Mall PO
Burnaby BC, V3J 7W2

CC: Hon. George Heyman, Minister of Environment and Climate Change Strategy
Katrina Chen, MLA
Burnaby Mayor and Council
Danny Ross, SFU Community Trust
David Suzuki Foundation

To the Mayor and Council of Burnaby,

As you know, we are entering a critical decade of make-or-break years when it comes to putting the brakes on climate change, and the 2018 IPCC report states that **we must limit our average global temperature warming to 1.5 degrees in order to avoid the worst impacts of the crisis.** Meeting even this target will already come with a great deal of impact to our world, intensified from the climate impacts we see all over the globe today. But it must be our starting point, at minimum.

Cities are responsible for 50-70% of emissions in Canada, and while we recognize the admirable commitment that Burnaby has already made to climate mitigation and adaptation, most cities currently **lack a data-driven process for measuring the impact of their activities on GHG reduction, and few have made explicit commitments to accelerate their pace and scale of GHG reduction to the extent that has been deemed necessary by the IPCC.** Burnaby's current community emissions target currently sits at a low 5% by 2041, while climate science demands we reach a 45% reduction by 2030 and 100% reduction by 2050, as a minimum. As a Western city with many resources, we know Burnaby can show up as a leader in meeting and beating those targets, which will help make up for the limitations of other communities with less resources.

To Mayor and Council of Burnaby, **we present over 1100 people in our community who support you in making actionable, bold decisions to mitigate and adapt to climate change,** as we play our part in tackling the climate crisis for our community, and the globe. We also present an endorsement letter signed by five community organizations active in our community, who are excited about this opportunity for Burnaby to take meaningful action.

We call on Burnaby Council to:

1. Pass a formal resolution to adopt the latest IPCC recommended GHG reduction targets of 45% below 2010 levels by 2030, 65% by 2040 (*staff is recommending that Burnaby aim even higher, with a 2040 target of 75%*) and 100% by 2050 for all community-wide emissions.
2. Establish a meaningful set of interim targets and ensure that these targets are incorporated into all forthcoming municipal planning documents, including Community Energy and Emissions Plans (CEEPs) and Official Community Plans (OCPs.)
3. Direct city staff to draft a plan for annual transparent measuring and reporting on the municipality's community emissions beginning no later than 2020, including a proposal for how these activities will be funded.

Referred to:

Environment and Social Planning Committee (2019.10.10)

Copied to:

City Manager, Dir. Corporate Services, Dir. Engineering, Dir. Planning and Building

We also call on you to **prioritize high-impact climate solutions that will drastically and rapidly reduce community emissions** as we undergo our unique transition to a renewable future, free from fossil fuels. This includes taking action on:

- ★ COMPACT, COMPLETE COMMUNITIES: Transit oriented development that prioritizes rental units and affordable family housing ahead of upscale luxury condos
- ★ MULTI-MODAL TRANSPORTATION that includes widespread, accessible public transit
- ★ RENEWABLE ENERGY: Including solar, district energy, geothermal energy and biogas
- ★ GREEN JOBS: In low carbon industries like green buildings, transportation, food production & clean tech
- ★ CIRCULAR ECONOMY: That reduces waste and diverts materials from our landfills

Please use the opportunity of your power to make decisions which plant the seeds of our future.

To the Mayor and Council of Burnaby,

We are writing to express our support for the adoption of ambitious new climate targets, as recommended by the Intergovernmental Panel on Climate Change (IPCC) in Burnaby. We are entering a critical decade of make-or-break years when it comes to putting the brakes on climate change, and the 2018 IPCC report states that we must limit our average global temperature warming to 1.5 degrees in order to avoid the worst impacts of the crisis.

Cities are responsible for 50-70% of emissions in Canada, and while we recognize the admirable commitment that Burnaby has already made to climate mitigation and adaptation, most cities currently lack a data-driven process for measuring the impact of their activities on GHG reduction, and few have made explicit commitments to accelerate their pace and scale of GHG reduction to the extent that has been deemed necessary by the IPCC. Burnaby's current community emissions target currently sits at a low 5% by 2041, while climate science demands we reach a 45% reduction by 2030 and 100% reduction by 2050, as a minimum. As a Western city with many resources, we know Burnaby can show up as a leader in meeting and beating those targets, which will help make up for the limitations of other communities with less resources. We are calling on Burnaby City Council to model the visionary leadership we need to attain deep and swift emissions reductions over the coming decade, by:

1. Passing a formal resolution to adopt the latest IPCC recommended GHG reduction targets of 45% below 2010 levels by 2030, 65% by 2040 and 100% by 2050 for all community-wide emissions.
2. Establishing a meaningful set of interim targets and ensuring that these targets are incorporated into all forthcoming municipal planning documents, including Community Energy and Emissions Plans (CEEPs) and Official Community Plans (OCPs.)
3. Directing city staff to draft a plan for annual transparent measuring and reporting on the municipality's community emissions beginning no later than 2020, including a proposal for how these activities will be funded.

The District of North Vancouver, City of North Vancouver, Vancouver, New Westminster, and Port Moody have all recently adopted the IPCC-recommended targets. We don't want Burnaby to fall behind or be last at the table when we know that this City is proud of longstanding leadership on climate issues. As Burnaby considers joining other cities in declaring a climate emergency, it must include the above asks as a minimum; an action-oriented and time bound plan that gives that declaration the teeth it needs to meaningfully mitigate and adapt to this crisis..

We look forward to Burnaby revitalizing its commitment to breakthrough climate action as we transition our region to the first zero-carbon metropolis in Canada!

SIGNED,

Dear Mayor and Councillors,

Thank you for adopting the Climate Emergency declaration for Burnaby and for your ongoing plans to help reduce Burnaby's carbon usage.

We would like to suggest one thing that we didn't see in the press release - please think about adding more EV charging stations around the city, for instance, at community centres, libraries, pools and other civic places where people spend time (City Hall included).

Sincerely,
Iain Macanulty & Vibeke Rasmussen (Burnaby)

Attn: City Council and Staff

I would like to take this opportunity to Thank YOU!!! for passing the motions to declare a climate emergency, raise our community emission targets and to strategise around how to achieve these targets!!!

As a Burnaby teacher, I try to model responsible buying, reusing and recycling (when necessary) at home (in our strata), at work (in the classroom and staffroom and at every school site) and at play (in everyday life). Reminding us through Skytrain ads, bus shelter ads and if possible Hwy 1 electronic display signs thanking people for taking transit a/b/d (in the case of the highway) urging people to take transit. The Highway signs could say during rush 'hour' while the roads are stopped "Shoulda taken transit" with a kite icon or "Here's how to get to....." on a direct bus/train etc.

The use of water fountains to refill our water bottles at schools could be adopted by other public buildings.

Encouraging our school district to utilise green roofs, solar panels on building sides (see Copenhagen's use

Referred to:

Environment and Social Planning Committee (2019.10.10)

Copied to:

City Manager, Dir. Corporate Services, Dir. Engineering, Dir. Planning and Building

of these intermittent panels), recycling grey water etc etc. for energy conservation and water use reduction. are a few suggestions it would be wonderful to see. Also, using rain water capture methods for toilets, gardens and green spaces should be used. Environmental specialists should be overseeing all new builds and retrofits in order to ensure we are building for the future, not for now.

I thank the City Council and the School District for implementing the use of charging stations at schools. It is a joy to see public places offering charging opportunities!

The above options will help us refrain from creating devastating environmental impacts like those produced Site C!!

Thanks for listening,

Dear Burnaby City Council:

I am a high school student that is part of this community, and I was elated to hear about the Council passing the Climate Emergency resolution on the 9th.

I hope that public transport can be cheaper and more widespread in the future, and I hope that more people working in the oil industry can transition to working in Green Jobs instead such as in Green Food Production, ~~Ren~~ renewable energy jobs, and clean tech. And of course, with more public transit, more people can work in that industry also.

I hope you can invest more into electric cars as well as heating in homes that do not primarily depend on natural gas.

In my apartment, our food waste isn't separated from trash because our building doesn't offer that option. All that food waste creating emissions in landfill could be taken in a green waste truck. My aunt in Vancouver has them, and I hope Burnaby apartment complexes can adapt them too.

Lastly, single-use plastic should be reduced on a greater scale. Packaging companies should use more paper and make less small packages. At my workplace, we use plastic aprons, and numerous plastic bags on the daily for the purpose of food service sanitation, but if you implement more green food service establishments, we can use cloth for all of it instead.

I want people in hotter regions to have a future and not be victims of climate displacement and widespread food shortage. I also want us to have a future that we can enjoy.

Thanks for reading,

Yilin Dong, Sept-16, Burnaby/Vancouver student

NOW'S OUR CHANCE to PROTECT ANCIENT FORESTS

September 12, 2019

Dear Mayor and Council,

British Columbia is world-renowned for its ancient rainforests and for the decades of activism to protect them.

Old-growth forests are critical to Indigenous cultures. They provide habitat for iconic endangered wildlife and anchor this province's multi-billion dollar tourism industry. With their ability to store more carbon than younger forests and buffer the impacts of extreme weather fluctuations, old-growth forests are our greatest weapon and our strongest shield in the fight against the climate crisis — the fight of our lives.

Despite all this, these life-giving ecosystems aren't protected. **On Vancouver Island alone, the logging industry cuts down the equivalent of 34 soccer fields worth of old-growth forests every single day.** Meanwhile, the forest industry has never been more unstable, with raw log exports, mill closures, contractor bankruptcies and job losses impacting families and communities.

Our latest paper, ***Old-Growth Crisis***,* highlights what's at stake and calls for bold shifts in policy and strategy to put healthy ecosystems, local livelihoods, Indigenous Rights and Title and climate resiliency ahead of the bottom lines of logging corporations.

While forestry laws and regulations are provincial jurisdiction, as a municipal government you hold a great ability to influence public opinion and champion what's right and raise concerns with the provincial government.

Read our publication, raise these issues with your MLA and the minister of forests and your counterparts. Contact me at torrance@wildernesscommittee.org or 250-516-9900 if you have any questions or wish to discuss these critical topics.

We owe it to future generations to speak up about the old-growth crisis before these forests are gone. Please rise to this challenge and champion the protection of old-growth forests in BC.

* [Available in Clerks Office](#)

Dear Mayor and Council,

I write to you as a member of the Metro Vancouver Home Trap Coalition. We are people with disabilities or mobility challenges who live in buildings that have only one elevator. Almost all of us have spent weeks or months trapped in our homes when our one elevator breaks down. It is an all-too-common occurrence due to lack of awareness in the planning and foresight of the construction of such buildings.

There has been an increase in media stories about people who can't access their jobs, schools, or any other activities of an everyday, normal life. Elevator maintenance companies find it increasingly difficult to service the elevators in a timely way leading to eventual breakdown and some of our most vulnerable citizens becoming essentially stranded in their homes. Many ageing people have been persuaded to move out of their single detached homes into a nearby building only to find out that it is a Home Trap with only one elevator. A major inconvenience at best yet a potentially fatal inconvenience at worst!

We are reaching out to organizations throughout Metro Vancouver communities to enlarge our Coalition. We are looking for a champion or champions on each Municipal Council who will bring forward the three main goals of the coalition:

1. End the approval of Home Traps in the municipality

Referred to:

Environment and Social Planning Committee (2019.10.10)

Copied to:

City Manager

Dir. Corporate Services

Dir. Planning and Building

2. Conduct a survey of how many Home Traps exist in the municipality
3. Prepare an analysis of what it would take to retrofit the Home Traps in the municipality

If you would like to be a part of our movement please contact me at [REDACTED] or visit our Facebook page '*Home Trap Coalition*'.

Mark Stockbrocks
Home Trap Coalition Member
