Subject: Request to improve traffic safety

Hello,

I am on the behalf of the citizens living in burnaby to write to you about the concerns of traffic safety for willingdon avenue. As you may know willingdon a ur is a very busy road which caused many accidents to occur. Espically at night time the roads are dark without many streetlights near by which is a concern for drivers to drive. Not to mention that when bad weather causes the roads harder to see with the little amount of light near by. In particular willingdon avenue of trans ananda highway is the most challenging one to see. Since the road lanes are not indicated clearly it is hard to see the lines. Therefore my request is to have the lighted lights located inbetween lanes for the willingdon avenue cross from trans Canada highway. Vancouver main roads have these lights built on the lanes which is very convienet for drives to be cautious. Since this road is driven by so many citiens per day it is a benefit to the government to reduce the amount of injuries or accidents on willingdon avenue. To conclude please consider the inconvenience and concerns the willingdon avenue brings to people without lights.

Sincerely, Michelle Lee
