For Traffic and Safety Committee

Hi TSC,

I strongly urge you to have pedestrian crosswalk white painted lines across from both sides of Mayberry crossing Patterson to Central Park.

- it is a well used pedestrian access into Central Park and to the tennis courts and practice wall.
- there is heavy pedestrian use from the adjacent high rises both south and north of Mayberry.
- many users are children and elderly.
- car and truck traffic on Patterson tend to speed because there are no cross streets.
- those making right turns from Mayberry to go north on Patterson tend to make the turn without stopping.
- the case for well marked crosswalks [plural] seem a "no brainer" to me.

Cheers,

Dan

Daniel McDonald
