Subject: Rezoning reference #12-43

Dear Sir, I am feeling very crowded in this area, people are constantly fighting with the traffic by jay walking and traffics are pushing through not even to wait until the people completely crossing the streets. The very dangerous cars accident occurred daily. It is just too many traffic lights on both Kingsway and Willingdon ave., you can see that there is not enough parkings around this areas , people just parked and went for their business. Our transit riders are longer and longer and buses can not plck up any more passengers once they have left the bus depot. I think it is almost to the boiling point. People are unable to find a family doctors close by any more. I am wondering families have to force to drive in order to get their kids to further away to attend schools. Would you please give this re-zoning a serious thoughts because this areas with so many new high rises still available , people are now not so friendly toward our new comers. It is just a damaged to our social fabric. The consequence is non-repairable. Do you want our Burnaby to become a hate crime area?

Hi, I have been missing some serious thoughts for your consideration to increase the density of building another two high rises, the one I have to remind you that the Burnaby Hospital is desperately outdated. The hospital is no longer able to handle more growth of the population and the fire trucks and emergency response time have been longer than it should be. I can testify recently there were two fires happened in our parking areas and the fire and response time were beyond our expectation. What happens if there were some earthquakes due to happen soon? Are we capable to handle these kinds of things happening in the future?
