Subject: objection to rezoning for 4341, 4351 Rumble street

Regarding the proposed zoning bylaw amendment to allow an expansion of the Fairhaven structure at 4341-4351 Rumble street There are some serious problems in the way the existing facility Interferes with daily life in the community. Specifically on rumble street.

My house is located on Rumble street, directly opposite the proposed expansion Almost on a daily basis I find cars parked in or blocking my driveway. Left there by People visiting, working or doing business at the Fairhaven facility.

I do not believe Fairhaven can not adequately resolve this situation because People find it more convenient to park across the street during rush hour periods rather than use the limited parking spaces provided. This also happens on hot summer days when many will park in my shaded driveway rather than in places provided for them in the sun.

Another problem occurs on garbage days Sometimes my trash is not picked up because people from the facility moved my trash containers away from the curb and place their own trash in front of mine. The situation improves somewhat when I lodge a complaint, but improvement is short lived and the problems are ongoing

I believe the application should be denied and expansion should not be allowed because these problems will get much worse and can only lead to lowering the quality of life in the community and a drop of residential property values

The proposed structure would severely detract from the character of the neighbourhood.  
A structure higher than the existing one is not appropriate for this area and location
