**Attn: Burnaby Board of Variance**

**Re: 7774 Government St., Burnaby**

Dear Honourable Board Members,

Our site at 7774 Government Street is subject to two site conditions that makes it impossible for a house to be designed under the current zoning bylaw. We are writing this letter to request a variance to allow for the use of a front yard setback of 47.89 feet to the door instead of the average front yard setback or 114.5 feet, calculated by the neighbouring properties. We feel this better reflects the neighbouring properties and is a compromise between the two extremes of the minimum front yard setback and the average front yard setback.

There are two factors that will put undue hardship when designing a house on our site. The first factor is that our lot depth is much less than the neighbours; therefore, their houses can be set back much farther than ours and the resulting front yard average that this creates takes over most of our lot at 114.5 feet. The second is that there is a water course behind our property which has been reviewed by the Environmental Review Committee (ERC) and they have asked for a minimum rear yard setback of 55.77 feet. Due to these two factors, there is no resulting building envelope since these numbers overlap.

We respectfully request a variance for using a front yard setback of 47.89 feet to the door instead of the average front yard setback. Without this variance, the site conditions will incur undue hardship on the buildable area and make it impossible for any house to be designed on this lot. We hope that you understand our situation and we thank you for your time and consideration.

Regards,

Raffaele & Associates

<b>LEGAL:</b>	<b>LOT:</b> 54	<b>DL:</b> 42
<b>PLAN:</b> 26832

**Zone/Section(s) R1 [101.8]**  
of the Burnaby Zoning Bylaw No. 4742

### COMMENTS:

The applicant is proposing to build a new single family dwelling. The following relaxation is being requested.

- 1) Under Section 101.8 of the Burnaby Zoning Bylaw the depth of the front yard is required to be 114.5 feet (based on front yard averaging). A front yard depth of 43.81 feet is proposed.

All projections into the proposed front yard will conform to the requirements of Section 6.12.

This variance is being requested in order to allow construction of the single family dwelling and its front porch within the required front yard.

*Note: A previous Board of Variance appeal (B.V.6246, October 7, 2016) seeking relaxation of the front yard setback requirement was denied.*

*Note: A previous Board of Variance appeal (B.V.6250, November 4, 2016) seeking relaxation of the front yard setback requirement was denied.*
