Hi there,

We have two kids one is four-year-old and the other is only nine months, so we almost stay at home everyday.

Every morning after 7:15, they began to work, the noise day is beginning.

Sometimes it like an earthquake, more noise makes my 9 months daughter can not sleep during the day.

Noise still did not stop at night around 10pm , and sometimes the noise like a blower.

Besides, for the dust we need to clean the home everyday otherwise there is too dusty to hurt our breathing system.

So this is our wonderful day as usual.

Best

Jianing Liu and Yuping Zhao
