Subject: plastic bags

Good morning Mayor and counsellors:

I have just recently heard that the city of Victoria is banning plastic bags in January of 2018...This is a wonderful example of how to help with waste in and around BC.

I believe that everyone in BC, and Canada for that matter, should adopt this plan, immediately.

Why not be the first city in the lower mainland to ban the use of plastic bags. I have already heard from the city of Port Moody, that they too are considering adopting this ban. Let's all get on board and stop this abuse of plastic in our oceans, and in our land fills.

We don't need to waste time with committees....Just do it....others will follow.

Respectfully,
Eddy Lang
