Subject: Question about SFU

I have one simple question to city council, when do you plan to put a firehall up here on the hill? Whenever there is a fire related issue we have to wait for the trucks to come from Production, Duthie or Hastings halls. The hill is a climb for the Duthie and Production halls and the distance is another issue for the Hastings hall. The population is growing fast up here and would it not make sense to at least put a joint RCMP and Firehall up here? There is a rapid growth up here at Univercity on SFU but not much growth by the city. I also find it interesting that you only have fire truck based out of the Duthie hall which again for the size of Burnaby seems ridiculous. Maybe the Mayor is more interested in spending money to fight the pipeline than people safety. Hopefully my question will make it to the mayor but I don't hold my hope for that. Thanks Paul.
