**Subject:** Inquiry Regarding Implementing Pedestrian Sign

Good Morning,

I am writing to inquire about having a pedestrian cross walk implemented near my workplace in a hazardous area. I would like to send a petition which will be signed by community stakeholders for the council to review for consideration. Before doing so I need a few things from you please.

This is a simple signage installation to ensure the safety of several office workers crossing between our complex and the business park/ mall area at Byrne Road and Marine way but a bit farther down from the big crosswalk that leads to Cactus Club just before the train tracks, we are a half way point at the road at MARKET CROSSING which ironically has no crossing. Daily several office workers here juggle to cross with massive trucks flying by. It is only a matter of time before someone is injured or killed this area is a high traffic area and each day myself along with several office workers who feed the local economy and the businesses within the large business complex with revenue and commerce. We are stakeholders and would like to see this improved. I am sure you can appreciate that when you have 30 minutes to grab lunch you do not want to walk all the way around to get the crosswalk up near the corner and double back, so all of us cross at Market Crossing where there is a sidewalk etc. The trucks come billowing down the road as if it were a HWY it is not safe for us. We spend 40 hours a week here and think it is a reasonable request.

1. I am not looking for lights just signage and road markings painted on the road.
2. I would like the city drawings please for this area so I can formulate this proposal.
3. I also would like to know the cost for this as I could possibly fundraise for the fees to cover the labor and installation for the city workers
4. I read that the counsel reviews these requests typically in August so I would like to know the cut off to have my petition and drawings submitted.
5. I would like the email for the local MLA elected in this specific area please.
6. I would like a copy or any records you have regarding safety and cross walk installations etc.

Thank you the screenshot of the area where my office is ClearDent and market crossing are attached. This is the area I would like the schematics/ drawings for please.

Thank you!

Stephanie

NOTE: This email has been forwarded to the Engineering Department for follow up.
