Subject: Request for a meeting with Burnaby's mayor & Councillors for a new alternative housing project and poverty reduction at BC.

Dear Mayor Mike Hurley,

Today, we can't deny the fact that people housing situations & poverty are increasing each year all over BC area.

The Ministry and social development with others communities try to help, by providing multiple services such as food and shelter to protect people from starving, and the death. But the question is how to slow this flow which keep rise each year for the next decade to BC's residents and his economy, regardless to focus on the main sources of that problem?

I'm persuaded that there is a solution to that problem, which I would like to share with you in person, within twenty minutes of presentation in Power point.

By keep hoping to hear back from you about my request in the mean time, please consider my sincere salutations.

Lemb. Henri
