REPORT

One tender for \$537,949.07 was received by the closing time on 2019 April 17. The scope of this project includes the removal and replacement of the damaged mesh and existing anchors and rock scaling to regrade steep sections.

GeoStabilization International Inc. has not previously undertaken a contract for the City; however, references from our consultant indicate that the contractor has the necessary equipment and personnel to successfully complete the work required under this contract. The Director Engineering concurs with the above recommendation.

There is sufficient funding for this project in various operating accounts within the 2019 – 2023 Financial Plan.
