Subject: Force of Nature: Request for delegation to environment and social planning committee

Hello,

I am contacting the city on behalf of Force of Nature Alliance, we are a local environment/climate focused organization with a Burnaby volunteer team. We are requesting to appear before the environment committee at their June 4th meeting, before their summer break.

We would like to address the committee on their recent motion passed asking staff to report how to increase Burnaby climate targets to 100% reduction by 2030 and declare climate emergency. Where the committee has signaled their interest in raising the cities climate targets and declaring climate emergency, we'd like to share our work we've done with 5 other lower mainland municipalities who have recently raised their climate targets to meet the minimum set by the Intergovernmental Panel on Climate Change, 3 of which declared emergency.

I will be the speaker representing our Burnaby volunteers - Jake Hubley, Force of Nature Alliance, Burnaby Organizer
