

June 17, 2019

Dear Mayor & Council,

The Burnaby Environment and Social Planning Committee voted in favour of the motion to reduce our emissions by 100% by 2050. I think our city is on the right track and hope Burnaby can take the next step and declare a climate emergency. Going forward please consider adopting the IPCC climate targets or higher for community-wide emissions. To make sure Burnaby upholds its climate commitments, there should also be a plan for measuring and reporting on our emissions progress.

Sincerely,

Jaqueline Mak.
