Subject: Environment Committee Meeting_Light House Sustainability Society

Dear Kathryn, Dear Environment Committee,

I am Hilal, a circular economy specialist at Light House. We would like to present some of our circular economy tools and programs in the upcoming Environment Committee meeting on May 20th to explore opportunities together with the City of Burnaby.

[Light House Sustainability Society](#) is a not-for-profit organization, and our work focuses on creating regenerative built environments that nurture ecological and human health. Through research, advocacy, education, and outreach, Light House's mission-driven work advance industry knowledge, tools, and best practices that strengthen the green building sector as a whole.

We would like to present our online resource-sharing marketplace, [BizBiz BC](#), which is helping to build Circular Economy in British Columbia by making it easy for businesses to connect, share resources and reduce waste. In addition, we would like to present some of our findings from the latest works, including [the Squamish Demolition and Deconstruction report](#), the [construction waste calculator](#), Design for Disassembly, [DfD](#), and the upcoming project creating a zero-waste certification for construction sites if there will be enough time. You can find some of our other works on this [page](#).

We hope to hear from you,
Thanks so much,

Hilal Savas B.ChEng, MEL, True Zero Waste Advisor
Circular Economy Specialist
