

NOTICE OF MOTION
2021 AUGUST 30

Councillor Alison Gu – Climate Action Policy Work

WHEREAS the effects of climate change, such as heat waves, disproportionately impact those who are already marginalized by society, especially those who are unhoused, racialized, Indigenous, working class or poor, and people with disabilities;

WHEREAS areas at higher risk of severe impacts of climate change and the urban heat island effect tend to also be historically underserved areas and populations that have been harmed by systemic oppression and wealth inequality;

THEREFORE BE IT RESOLVED THAT any policy work related to climate action addresses our goals of reconciliation and equity, and are nature-based wherever possible.
