Re: Seton Villa - 48 Wheelchair Accessible Units (Main Street – Project)

I would like to show my support for the proposed 48 new wheelchair accessible housing units at Seton villa. This new housing opportunity will allow seniors who are already living an independent lifestyle at Seton Villa the chance to stay once they have either lost or face diminishing mobility issues.

The loss of mobility whether sudden or gradually is not only hard from a physical standpoint on a senior, but mentally it is even harder.

These seniors have already made good friends with other residents and have established some roots, both of which are vital as one enters their senior years. Being comfortable and not having to move around to a different care home due to current or expected mobility issues puts a strain on an already physically or mentally fragile senior.

The Lower Mainland in general does not have enough independent senior living facilities to accommodate the growing need. If not at the Seton Villa site, then where do you expect to build a facility in Burnaby? I expect in any neighbourhood you will receive some resistance, but this area has already a well-established community for the residences of Burnaby.

These residents have paid their dues over the years building the City and Province to where it is today and deserve to have their senior years in comfort.

Thank you,

Re: Seton Villa - 48 Wheelchair Accessible Units (Main Street – Project)

I would like to show my support for the proposed 48 new wheelchair accessible housing units at Seton villa. This new housing opportunity will allow seniors who are already living an independent lifestyle at Seton Villa the chance to stay once they have either lost or face diminishing mobility issues.

The loss of mobility whether sudden or gradually is not only hard from a physical standpoint on a senior, but mentally it is even harder.

These seniors have already made good friends with other residents and have established some roots, both of which are vital as one enters their senior years. Being comfortable and not having to move around to a different care home due to current or expected mobility issues puts a strain on an already physically or mentally fragile senior.

The Lower Mainland in general does not have enough independent senior living facilities to accommodate the growing need. If not at the Seton Villa site, then where do you expect to build a facility in Burnaby? I expect in any neighbourhood you will receive some resistance, but this area has already a well-established community for the residences of Burnaby.

These residents have paid their dues over the years building the City and Province to where it is today and deserve to have their senior years in comfort.

Thank you,

Josie Donatiello

Re: Seton Villa - 48 Wheelchair Accessible Units (Main Street – Project)

I would like to voice my support for the proposed 48 new wheelchair accessible housing units at Seton villa. This new housing opportunity will allow seniors who are already living an independent lifestyle at Seton Villa the chance to stay once they have either lost or face diminishing mobility issues.

These seniors have already made good friends with other residents and have established some roots, both of which are vital as one enters their senior years. Being comfortable and not having to move around to a different care home due to current or expected mobility issues puts a strain on an already physically or mentally fragile senior.

My mother (Emilia Antoshchuk) could very well be in that position in a few years and knowing there is the possibility of staying at Seton Villa, a care home she really enjoys is most comforting for us as a family. Life has come full circle for her as my mother has seen both sides of a care home. As a young lady she worked at Glen Hospital feeding seniors, now as a senior she is one of those seniors receiving the same care she delivered to others.

Emilia is a lifelong Vancouver / Burnaby area resident, so having my mom able to stay close to our residence now and in the future by the addition of the new 48 wheelchair accessible units if the need is there, is important to us.

These residents have paid their dues over the years building the City and Province to where it is today and deserve to have their senior years in comfort.

Thank you,

The Lower Mainland in general does not have enough independent senior living facilities to accommodate the growing need. If not at the Seton Villa site, then where do you expect to build a facility in Burnaby? I expect in any neighbourhood you will receive some resistance, but this area has already a well-established community for the residences of Burnaby.

These residents have paid their dues over the years building the City and Province to where it is today and deserve to have their senior years in comfort.

Thank you,

TYLER Williams

Re: Seton Villa - 48 Wheelchair Accessible Units (Main Street - Project)

I would like to show my support for the proposed 48 new wheelchair accessible housing units at Seton villa. This new housing opportunity will allow seniors who are already living an independent lifestyle at Seton Villa the chance to stay once they have either lost or face diminishing mobility issues.

The loss of mobility whether sudden or gradually is not only hard from a physical standpoint on a senior, but mentally it is even harder.

These seniors have already made good friends with other residents and have established some roots, both of which are vital as one enters their senior years. Being comfortable and not having to move around to a different care home due to current or expected mobility issues puts a strain on an already physically or mentally fragile senior.

The Lower Mainland in general does not have enough independent senior living facilities to accommodate the growing need. If not at the Seton Villa site, then where do you expect to build a facility in Burnaby? I expect in any neighbourhood you will receive some resistance, but this area has already a well-established community for the residences of Burnaby.
